

ALASKAN MADE FOR ALASKA

InsulFoam® 40
InsulFoam® 60

Pure Performance of InsulFoam 40 & InsulFoam 60

ROAD & HIGHWAY BASE • RAILROAD BASE • PERMAFROST PROTECTION • PLAZAS & PARKING STRUCTURES • FOUNDATIONS
UNDER SLAB • WATERLINES & SEPTIC SYSTEMS • UTILIDORS • DRILL PADS & MUD PITS • ICE RINKS • FREEZER SLABS • COLD STORAGE

The proven performance of InsulFoam 40 and InsulFoam 60 features the same fundamental EPS chemistry that has been in use since the mid-1950s while utilizing a specialized plank-mold manufacturing technique. In addition, InsulFoam 40 and InsulFoam 60 have been successfully used in Alaska for 25 years.

Designers are well-served knowing the products' thermal properties will remain stable over the entire service life. As there is no thermal drift, the products are eligible for InsulFoam's 20-year thermal performance warranty. InsulFoam 40 and InsulFoam 60 also contain no formaldehyde or ozone-depleting CFCs and both are 100% recyclable. Ideal for a large number of applications, they do not readily absorb moisture from the environment. Both products are produced in Anchorage, Alaska, providing reduced lead times in comparison to competing products.

InsulFoam 40 and InsulFoam 60 have both been accepted and used by numerous institutions and public companies. Some entities of note are: FHWA, Alaska DOT, Army Corps of Engineers, Municipality of Anchorage, Fairbanks North Star Borough, Mat-Su Borough, ARCO, Phillips, Alyeska, AWWU, FAA and GSA. They both also meet the strength and water resistance properties AASHTO M230.
